

VELFOUR®

FOUR-LAYER BANDAGING SYSTEM FOR
TREATMENT OF VENOUS LEG ULCERS &
LYMPHEDEMA

PROPERTIES

- 4-layer bandaging system specially designed for treating venous leg ulcers & its associated conditions.
- Appropriate for patients with ankle circumference between 18-25 cm's.
- Long wear time for up to 7 days (may change depending on drainage)
- Imparts a pressure of 40 mmHg of High Sustained Compression Therapy (HSCT) at the ankle, reducing gradually to 17 mmHg at the knee
- An effective level of compression is maintained even up to a full week after application
- Soft Orthopedic padding increases patient comfort and protection of bony structures
- Soft Orthopedic Padding has high absorption capacity
- ABI assessment recommended before use
