

Add an Extra Layer of Security

“Use Latest Holographic Solutions for Electronic Products”

Electronic goods are probably the most pervasive and the most used around the world. Often, while using them, people tend to forget that not just the devices, but the components that form the core of the instrument are also the contribution of electronics. Hence, electronics constitute the heart of modern day living.

Needless to say, counterfeiting, if pervasive in electronics, can shake up the very core of human civilization. Hence, it is one of the most important industries where counterfeiting must be countered and resisted with the greatest force. However, the malicious forces too are incredibly powerful here

Now, electronic products, unlike many others, is not just about luxury, but also daily necessities. So, buying counterfeit goods will inevitably throw your everyday life into mayhem as appliances can become defective during any period of the day, the devices stop working randomly at odd hours. In fact, it can end up being fatal if the circumstances are such.

We know how much is at stake when it comes to electronic products. Hence, we offer a broad range of Anti-Counterfeiting Products including Holographic Barcodes, Holograms, and Labels etc.

By creating multiple layers of security, especially for the components that form the heart of every electronic product, it ensures a safer and more sustainable environment where technology does not become a headache. Since electronics is remarkably pervasive, it is necessary to devise multiple methods of security as not one shoe fits all sizes. The company supplies the countermeasures according to the demand.

Being a manufacturer of holographic solutions, Lasersec Technologies can offer customized Anti-Counterfeiting Products, according to the specifications and requirement of the electronic industry

We offer wide range like:

Anti-Counterfeit Labels

Holographic Barcode Labels

Tamper Proof Holograms

Hologram Warranty Stickers

2D/3D Holograms

Self-Adhesive Holograms

Promotional Coupons

ANTI-COUNTERFEIT LABEL

We fuse running as well as a registered holographic image into the labels which provide a genuineness of the product. We print labels in Roll and Sheet form and provide ready to use holographic labels. We can also add other security features like Invisible Text (U.V & I.R Coding)

HOLOGRAPHIC BARCODE LABELS

We develop the labels using advanced technology and are reckoned for their high reliability, quality, attractive look, excellent adhesive property, and durability. Our Barcode Label is waterproof & sticky and does not cause any damage to the surface on which it is pasted. We offer different kinds of Barcode Labels like Plain Label, Barcode Label and Holographic Barcode Label which comes in different colors, sizes, shapes.

TAMPER PROOF HOLOGRAMS

We offer these holograms with a unique feature that once affixed at the required place, any attempt to remove it will lead to its destruction. Some of these hologram stickers are very brittle and are self-destruct when tampered. In some cases, it leaves behind a residue or sticky substance after they are peeled away. Also, can be supplied in Roll Form or Sheet Form with 24/36 micron thickness.

HOLOGRAM WARRANTY STICKERS

Warranty is a written statement which is directly associated with the sale and purchase of the product. Easy to apply, these hologram stickers are self-adhesive and tamper evident. We use the latest technology & virtually impossible to duplicate or replicate. We also custom design these hologram stickers in different sizes with company's name and logo.

2D/3D HOLOGRAMS

2D/3D Holograms are made up of multiple two-dimensional layers with hologram images visually placed one behind another with visual depth to produce an effect of three-dimensional hologram structure.

We use latest technologies for manufacturing and provide the best quality and long-lasting line of 2D/3D holographic stickers that serves all purposes for electronics sector.

SELF-ADHESIVE HOLOGRAMS

These stickers with holograms, the hologram strip is transferred on the stickers to provide uniqueness with complete security. These security stickers can also be integrated with security inks like UV inks, serial numbering etc. We offer a comprehensive range of Self Adhesive Hologram Stickers at competitive prices. These stickers are available in various sizes, shapes, and dimensions and widely used for providing security to electronics products and packaging.

PROMOTIONAL COUPONS

We can create custom-made design scratch off hologram with your company name, logo as well as all-purpose design hologram scratch. We manufacture scratch holograms off stickers carrying pin code, password or other information under the scratch coat; these are good safe and foolproof tools broadly applied in the industry.

About Lasersec Technologies

Lasersec Technologies is the leading manufacturer of holograms being used as an anti-counterfeiting device. We ensure a high-level secrecy and quality at each and every step right from production to delivery of products. We enjoy a wide network of branch offices in all the metro & major cities in India. We are also having business alliances outside the country in Bangladesh, Srilanka, Malaysia, Nepal, Europe & UK.
